APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place of use of the waters of an underground source as heretofore granted under Permit 45834 is issued subject to the terms and conditions imposed in said Permit 45834 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 72728 through 72749 shall not exceed 25,000 acre-feet annually.

The issuance of this permit is subject to the terms and conditions of the State Engineer's Ruling issued August 17, 1983.

This permit is issued as a preferred use of the limited resource as authorized by NRS §534.120 (2) and set forth in the State Engineer's Order No. 821 issued on August 23, 1983.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

A monitoring plan must be developed and submitted to the State Engineer for approval prior to diversion of any water authorized under this permit. If information from the monitoring plan, or other study, demonstrates an adverse impact on other rights, mitigation will be required to the satisfaction of the State Engineer.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 6.0 cubic feet per second, **but not to exceed 4344 acre-feet annually.**

Work must be prosecuted with reasonable diligence and be completed on or before:

**December 19, 2006**

Proof of completion of work shall be filed before:

**January 19, 2007**

Water must be placed to beneficial use on or before:

**December 19, 2011**

Proof of the application of water to beneficial use shall be filed on or before:

**January 19, 2012**

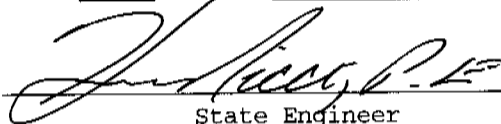

Map in support of proof of beneficial use shall be filed on or before:
